THURSDAY, FEB. 24, 1898.

A NEW INDUSTRY.

There is nothing unreasonable in our asking our readers to consider the idea of raising sugar beets in the Sequachee Valley as we believe it can be done profitably and successfully. What the people in other states have done and are doing can, we believe, be done right here and it is the duty of all enterprising and progressive people to take hold of all and any advantages which the conditions of the country seem to offer to them. Will they be wise and take hold?

The culture of the sugar beet has grown in volume in this country, and is now recognized as a stable industry in many states. In New York State is one of the last to take hold of and encourage it, and the way it is done may be safely followed by the people in this Valley, and we believe thousands of acres of land which now are open and wild may be brought into good and profitable service.

What the farmers of Chataqua Co., N. Y., are doing is best known by their recent action at a meeting held recently at Fredonia. Three hundred attended. There are factories now existing at Binghamton and Rome to whom the State of New York paid a bounty of \$1 a ton for every ton used. This meeting was in the interest of establishing a factory at Dunkirk, which is now assured. The city of Dunkirk furnishes the site for the factory, the water board, water for the plant, and capitalists raised \$600,000 with no restrictions. The meeting was called to secure acreage, and the 300 farmers responded nobly. They will get \$4.75 for every ton of beets they can raise.

The appended notice shows what is expected of them.

SUGAR BEETS WANTED FOR 1898.

The undersigned is prepared to receive applications for the growing of sugar beets for the season of 1898 and four successive seasons for delivery to the proposed Beet Sugar Factory of Dunkirk, N. Y. The Beet growers will have a representative at the factory who will watch their interests. The Company will have Agricultural Superintendents who will teach them how to grow beets successfully the very first year so as to obtain large yields and also teach them how to save labor in the field. The latest improved farm implements will be brought from the West thus enabling the farmers of Chataqua county to take up the growing of beets at a point now reached by the western growers, getting the full benefit of the experience gained there during the past six years by the Nebraska Beet growers. Farmers who subscribe can pay for their subscriptions out of the profits of their beets covering a period of two years, not asked to advance any money whatever. The factory will pay cash on the 15th of each month for all beets received during the previous month.

Now what can be done in New York State can be done right here and if the people will only start in the right way, a profit is always ready to assist a meritorious enterprise.

What we propose is this. Let everyone who can try a little piece of land. There are hundreds of acres of land along the edges of our creeks and rivers now abandoned which would grow the beet fine. Answering objections to grow. If there is no factory here, if you don't try, you will never

know whether they can be raised here or not. Let us get out of the old rut of raising corn for nothing and raise something in which there is a profit.

That people will learn something was shown right here last summer. Mr. Wm. Owen on land reclaimed from the orchard raised magnificent turnips and sold for \$1. He had more than he could sell which was a good thing for him, as he has this winter fed his cows entirely on pea hay and turnips, with no corn, and his stock look finely, so with beets, if they cannot be used at once for sugar they are fine feed.

We propose to apply to the Agricultural Department for seed to try, and if they grow well, as we believe they will, there's no better location in any section for a factory than in Sequachee, and we venture the assertion that location, water and capital will be found, if the farmers will take hold and help themselves.

Close the column—push the singing.

Man of pluck—down with your name!

Let the croakers do the whining.

Nothing venture nothing gain.

Beets are not grown on good wishes, but on good acts.

The coming mortgage lifter—

Dippe Klein Wannabeener.

The Lehi, Utah, factory will this year pay \$4.25 per ton for beets; they paid \$4 last year.

The Germans are freely taking acreage—lots of good gardeners come from the "Fatherland."

The past ten days has greatly widened the territory tributary to the Dunkirk beet sugar factory.

A rate not exceeding 25 cents per ton for distances less than 25 miles is the right sort of transportation talk.

Three hundred and twenty five head of cattle and about 1000 sheep were fed last year in the corral of the Lehi factory.

Sugar beet tests made last year in New York average higher than any other state; they were over 5 per cent higher than in Missouri.

On the McAllister farm near Sinclairville there are 100 acres as level as a house floor and without a stone; plant that land to sugar beets and at one stroke you double its value.

1891—Farmers afraid to sign, had to go off a hundred miles to get beets enough. 1897—Thousands of acres offered more than the factory had capacity to use. These are two chapters of the story at Norfolk, Va.

American inventive genius and push can't compete with European cheap labor in the production of sugar, can? Well we are going to try it.

The Rome beet sugar factory has contracts for next season with 860 farmers.

The home production of sugar will be claimed injure the foreign market for wheat. Well if we can sell wheat to sugar makers in Europe why can't we sell wheat to sugar makers in America. Logic is logic.

New Music—Liberal Offer.

Billiousness

Is caused by torpid liver, which prevents digestion and permits food to ferment and putrify in the stomach. Then follow distress, headache, insomnia, nervousness, and, if not relieved, bilious fever or blood poisoning. Hood's Pills stimulate the stomach, cleanse the liver, cure headache, dizziness, constipation, etc. 25 cents. Sold by all druggists. The only Pills to take with Hood's Sarsaparilla.

We have received from the Nashville American a copy of the Cumberland Almanac for 1898 and it is what it claims to be—a veritable Cyclopaedia of historic and statistic facts, well gotten up and useful to everyone. The price, 25 cents, puts it within the reach of everyone, and for the valuable information it contains the price is but nominal, and the book is valuable for reference.

Pennsylvania papers report that the vineyards are being pulled up in the grape belt, because they don't pay. The Southern vineyard will produce almost all the grapes of the country, because they catch the market first, and like the cotton manufacturing business can compete with anything. This is an argument for the extension of the Sequachee Vineyards.

English justice has its good as well as its bad side. A notable instance of the better feature of it is found in the conviction this week for fraud of a sprig of British nobility and his sentence to penal servitude for five years. Lord William Nevill, of the proud family of that name, claiming descent from Gilbert de Nevill, one of the companions in arms of William the Conqueror, will now don convict's garb and take his place with other criminals of poorer blood and fewer known ancestors. Something of the same spirit in the administration of justice in the United States would be a vast improvement on the present vogue of some of our courts.

\$100 Reward. \$100.

The readers of this paper will be pleased to know that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
